HVI-2100 CERTIFIED RATINGS comply with new testing technologies and procedures prescribed by the Home Ventilating Institute, for off-the-shelf products, as they are available to consumers. Product performance is rated at 0.1 in. static pressure, based on tests conducted in AMCA’s state-of-the-art test laboratory. Sones are a measure of humanly-perceived loudness, based on laboratory measurements.

NOTE: Minimum hood distance above cooktop must not be less than 24”.
A maximum of 30” above the cooktop is highly recommended for best capture of cooking impurities.
Distances over 30” are at the installer and users’ discretion; and if ceiling height and flue length permit.
