NOW WITH A NEW LED DISPLAY WITH ELECTRONIC TOUCH CONTROLS, 2 LEVEL LIGHTING, 30 MINUTE AUTO SHUT OFF, AND 10 MINUTE INTENSIVE SPEED CONTROL

# Dimensional Diagrams

## Ducted

## Ductless

**Pre-Planning Your Installation** - Important: Consult the installation instructions before you begin installing this rangehood.

## Ducted

## Ductless

The ducted Stilo Isola chimney can be adjusted for ceilings between 7' 4 3/4" and 8' 11 3/8" depending on the distance between the bottom of the hood and the cooktop (distance x in above DUCTED diagram). The ductless Stilo Isola chimney can be adjusted for ceilings between 7' 10 3/8" and 8' 11 3/8" depending on the distance between the bottom of the hood and the cooktop (distance x in above DUCTLESS diagram). For higher ceiling installations, the High Ceiling Chimney Kit includes an additional support structure which adds 27 1/2" to the various ceiling heights in the figures above.

**Pre-Planning Your Ductwork** - Important: Consult the installation instructions before you begin installing this rangehood.

Make your ductrun as straight and short as possible. The ductrun should not exceed 35 equivalent feet if ducted with the required minimum of 6" round ductwork. Count 45° angles as 3 feet, 90° elbows as 5 feet, and 90° flat elbows as 12 feet.

**For best results, use no more than three 90° elbows. Make sure that there is a minimum of 24" of straight duct between elbows if more than one is used. Do not install two elbows together. If you must elbow right away, do it as far away from the hood's exhaust opening as possible.**

**WARNING!** Product specifications are subject to change without notification. Consult the installation instructions before you begin installing this rangehood. **Rev.07/11**

## Ductless Installations

For installations where ductwork is impossible or highly impractical, a **Ductless Conversion Kit** is available.

Charcoal filters, which attach to the blower assembly, absorb smoke and odors. A ductless diverter directs the air out to a lower chimney with vent grates cut into the sides.

**\* it is highly recommended that professional style cooking always be vented to the outside.**
