

**U.S. Wastewater Treatment Plants with Anaerobic Digestion
JULY 2011**

The following information is a partial list of wastewater treatment plants conducting biosolids anaerobic digestion in the United States. It was assembled by InSinkErator using information collected from the individual wastewater treatment plant's website(s) and the US EPA 2004 and 2008 Clean Water Needs Survey (<http://water.epa.gov/scitech/datait/databases/cwns/index.cfm>)

Information collected from June - July 2011. InSinkErator believes the information summarized below to be accurate at the time this list was assembled (7/11) and will update it occasionally. However, these web sites and even the wastewater treatment facilities themselves are constantly being updated or changed. Accordingly, InSinkErator recommends that you check with your wastewater authority for the most complete, accurate and up-to-date information.

How to use this information:

1. Find your state, county, and/or city; information is arranged in alphabetical order by state.
2. "YES" in the "BENEFICIAL USE OF BIOSOLIDS" column indicates the treatment plant reports the biosolids are being used as a fertilizer product, composted, or land applied.
3. "YES" in the "BIOSOLIDS DIGESTER GAS UTILIZATION FACILITIES" column, the plant is using the methane gas from the anaerobic digestion process to fuel boilers or generate electricity.
4. "NO" in both columns, the plant does not capture methane from solids processing or turn the solids into a fertilizer product.
5. "UNKNOWN" in both columns indicates that no confirmation was available through the plant's website or the 2004/2008 Clean Water Needs Survey of the performing beneficial use of the biosolids or methane gas.

Abbreviations: STP: Sewage Treatment Plant; WWTF: Wastewater Treatment Facility; WWTP: Wastewater Treatment Plant; WPCF: Water Pollution Control Facility; WPCP: Water Pollution Control Plant; WRF: Water Reclamation Facility
