HeatRight™ system
The HeatRight™ system’s True convection helps you to cook food faster** with a rear fan and third heating element to circulate hot air over, under, and around food.

QuickSelect™ system
The QuickSelect™ system’s FlexHeat™ triple radiant element is like having three elements in one. A 6” inner ring is great for smaller pots and pans, while 9” and 12” outer rings make room to heat larger cookware.

TimeSavor™ system
The TimeSavor™ system’s Frozen Bake Technology allows you to skip preheating for favorites like pizza, lasagna, chicken nuggets, fries or pies so you can cook frozen foods faster.*
The NEC calculated load is less than the total connected load listed on the circuit breaker is recommended.
