

DIRTY TO DONE!

PART TWO

Put a new spin on your laundry routine with the **Miele W1 washing machine and T1 tumble dryer**. This powerhouse duo is stacked with sophisticated technology that will make you rethink how you do laundry--by thinking less about it.

THINK LESS ABOUT...

How To Configure Detergent

Sure, you can add your own detergent, but with the top two new Miele W1 washing machine models one can take the guesswork out of laundry thanks to a feature called **TwinDos**—the first automatic, two-phase detergent dispensing system that delivers the right amount (and type) of detergent at exactly the right time. With the help of **CapDosing**, delicate items can be cleaned conveniently by using Miele capsules. The capsules are placed in the fabric conditioner compartment and automatically dispensed at the precise time during the wash cycle.

THINK LESS ABOUT...

Where To Place Your Machines

Miele's W1 washing machine and T1 tumble dryer can be installed as a stack, side-by-side, or even undercounter, so your laundry needs are easily met, while providing a smaller footprint. Let the W1 also surprise you with what it can hold! The machine can hold up to 3 baskets of items (approximately 17.6 lbs) while also providing the flexibility of handling smaller loads.

THINK LESS ABOUT...

Your Energy Bill

The Miele T1 tumble dryers help cut down on operating costs (and save the environment) by reusing heat generated during a cycle. Plus, the low temperature heat-pump technology protects delicate textile fabrics and dries them with convenience. Even more impressive? The T1 tumble dryers have been designated as the **Most Efficient ENERGY STAR® certified products** in 2018.

A NEW GH SEAL HOLDER

Miele's W1 washing machine and T1 tumble dryer impressed the pros from the GH Institute Cleaning Lab. Here's why:

The new Miele washer and dryer are easy to use and have large capacities for machines of this size. With a wide array of cycles and options, there's no laundry load they can't handle. The **TwinDos** system not only takes the guesswork out of measuring and adding detergent and bleach, but impressively removed even set-in stains from our test swatches. Our test laundry loads were done quickly and well!
