

Ranges present a tip-over hazard that can be extremely dangerous, especially to any setting with children. All Summit ranges ship with an anti-tip bracket.

Failure to install the anti-tip bracket can result in death or serious burns to children or adults.

The bracket helps to prevent the range from tipping forward if excess weight is applied to an open oven door. It is strongly recommended that you install the anti-tip bracket when installing your range.

For a replacement anti-tip bracket, call our Parts Department at **718-893-3900 ext. 598**
