*A.D.A. /A.B.A. Conditional Submission

When properly installed, this model is A.D.A.-qualified based on the Uniform Federal Accessibility Standards, the United States Access Board's A.D.A./A.B.A. Accessibility Guidelines and the Department of Justice's 2010 A.D.A. Standards for Accessible Design, exclusive of the auxiliary airflow adjustment mechanism in the freezer, which is factory pre-set for optimal performance.

¹2018 Launch

Specifications Subject to Change

A.D.A. Compliance Specifications

Ranges

Specified models feature the following qualities:

- Maximum high forward reach for controls and operating mechanisms of 48".
- Maximum low forward reach of 15".
- Controls and operating mechanisms that are operable with one hand and do not require tight grasping, pinching, or twisting of the wrist with a force to activate greater than 5 lbs.
- Front controls that do not require reaching across burners.

Cooktops

Specified models feature the following qualities:

- Maximum high forward reach for controls and operating mechanisms of 48".
- Maximum low forward reach of 15".
- Controls and operating mechanisms that are operable with one hand and do not require tight grasping, pinching, or twisting of the wrist with a force to activate greater than 5 lbs.
- Insulation or other protection on the exposed undersurfaces to prevent burns, abrasions, or electrical shock.
- Front controls that do not require reaching across burners.

Wall Ovens

Specified models feature the following qualities:

- Maximum high forward reach for controls and operating mechanisms of 48".
- Controls and operating mechanisms that are operable with one hand and do not require tight grasping, pinching, or twisting of the wrist.
- Controls on front panels that may be activated by a force of no more than 5 lbs.

Warmer Drawers

Specified models feature the following qualities:

- Maximum high forward reach for controls and operating mechanisms of 48".
- Controls and operating mechanisms that are operable with one hand and do not require tight grasping, pinching, or twisting of the wrist.
- Controls on front panels that may be activated by a force of no more than 5 lbs.

Refrigeration

Specified models feature the following qualities:

- Maximum high forward reach for controls and operating mechanisms of 48".
- Maximum low forward reach of 15".
- Controls and operating mechanisms that are operable with one hand and do not require tight grasping, pinching, or twisting of the wrist.
- Controls that may be activated by a force of no more than 5 lbs.
- Refrigeration that has at least 50% of the freezer space below 54" from the floor and 100% of the fresh food space below 54" from the floor.
- Freezers with less than 100% storage volume between 15" to 48" are self-defrosting type.

Dishwashers

Specified models feature the following qualities:

- Maximum high forward reach for controls and operating mechanisms of 48".
- Maximum low forward reach of 15".
- Controls and operating mechanisms that are operable with one hand and do not require tight grasping, pinching, or twisting of the wrist.
- Controls that may be activated by a force of no more than 5 lbs.
- All rack space accessible from the front of the machine for loading and unloading dishes.
